DanielGeek / README.md ✏️

Daniel Ángel Barreto

Software Engineer | +12 Years Experience | 🇺🇸 C1 Advanced English Speaker | React, Node, Expert Blockchain, Rust, Solidity, Javascript, TypeScript | Solana | AI | 🤓 Happy to Connect!

👋 Hi! I'm Daniel. Nice to meet you.

You might be wondering how I can help your team or your project...

When I started to work as a Software Engineer for large companies, I discovered that this kind of job is much MORE than just being a good programmer.

I started listening carefully to my team.

I understood that hearing them is the best way to know how can I help the team to achieve the goal.

A project that made me very proud to do was at Angels, where I helped the entire team to integrate a Rust backend API with AI libraries and developed the frontend using React/Next for more than +100 of web3 users – something that would never have been possible if I didn't start learning about software development and AI.

In general, I consider my top 3 skills to be:

• Advanced Rust, Javascript and React Proficiency • Leading Team Members to Accomplish a Shared Goal • Developing Simple, Creative Solutions to Complex Problems

I also have extensive experience with:

• Go • Python • NextJS • C • C++ • NodeJS • Listening to Developers' Challenges and Concerns • Communicating with US Clients • Conducting Technical Interviews with Candidates • Managing a Team of 6 Junior Middle and Senior Developers • Prioritizing Product Backlogs for 3 Different Products

🤔 Do You Think I Can Help Your Team/Project? **Message Me with the Word "Chat" So We Can Talk**. Even if I can't help you, perhaps I know someone who can. 👍
